Aimetis E3200 PoE Series™

Physical Security Appliance

Aimetis E3200 PoE Series™ Physical Security Appliance combines purpose-built hardware with Aimetis Symphony™ video management & analytics software, creating a high performance intelligent video surveillance platform for installations up to 8 cameras. Its robust fanless design and flexible installation options makes the E3200 Series an ideal solution for space constrained environments such as small footprint retailers, gas stations and harsh environments.

### Quick and Simple Installation

Designed to minimize installation and setup time, the E3200 requires no software installation or activation. The onboard DHCP and SMTP servers make configuration of isolated camera networks easy.

Easy to Use

With the industry's best combination of video recording, management, analytics and reporting, users benefit by using a single interface that eliminates the need to jump between multiple vendor products.

### Power over Ethernet (PoE+)

The E3200 PoE Series is a 802.3at-compliant Power over Ethernet device drawing less than 25W of power. The device offers installation savings by eliminating costs associated with electrical wiring, and since it does not require an AC outlet it can be placed within 100 meters of any switch or midspan, allowing for easier placement. Even during a power failure the E3200 will continue to operate by leveraging the same UPS used to back up the network infrastructure.

Key Features:

- Wide range of supported camera manufacturers
- Small fanless form factor
- No software installation or activation required
- Wall or desktop mount options

Software Viewing Options:

- Windows Client
- Web
- iPhone / iPad
- Android

Features and Specifications

Model	E3205POE	E3210POE
CPU	Intel® Atom™ N2800 1.86 GHz	
RAM	2GB	
OS	Win 7 embedded on 8GB Flash Drive	
Video Storage	500GB	1TB
Video Management Software	Symphony Standard	
Camera Licenses Incl.	4	8
Ethernet	2x GbE	
USB	4	
Integrated I/O	4/4	
Network Protocols	DHCP, SMTP, SNMP	
Extended storage	With NAS	
Video Analytics Ready*	Yes	
ONVIF	Yes	
Operating Temp.	0 to 40ºC	
Dimensions (mm)	268W x 174D x 44H	
Weight	2.5KG	
Input Voltage	12VDC/5A Max or Power over Ethernet Plus (PoE+) IEEE 802.3at, max. 30W	
Compliance	CE, FCC, RoHs	
Mounting Kit	Wall, DIN-Rail included	
Warranty	2 year	
Ordering Information	AIM-E3205POE	AIM-E3210POE

Aimetis Symphony™ Software

Aimetis Symphony™ is award-winning intelligent video management software that offers an innovative, open IP video platform for video management, video analytics, system integration and alarm management. Aimetis Symphony™ installs on standard IT hardware, supports both analog and IP cameras from hundreds of camera manufacturers, provides a feature-rich, easy-to-use interface and incorporates IT friendly features to make administration simple.

Purpose-Built Hardware Platform

The Aimetis E3200 is designed for flexible deployment in any scenario. The onboard Intel® Atom® processor provides unsurpassed performance with very low heat generation and minimal cooling requirements, resulting in improved stability and longevity. A tough aluminum case with heat dispersing fins draws heat away from the processor and enables the system to operate in environments not suitable for commercial off-the-shelf PCs. To provide installation flexibility, the E3200 can be wall or DIN-rail mounted.
